

# Why PARTNERS platform?

# PARTNERS

F-CRIN Labeled Platform

**For your clinical trial, trust PARTNERS.  
All together, we are stronger.**

- **For its scientific leadership** covering a broad panel of therapeutic areas.
- **For its experts** able to develop innovative methodological ideas and protocols for original clinical research projects.
- **For its access**, through different partners, to some of the most important and innovative experts in specific fields.
- **For its experienced clinical operational teams** that manage all aspects of clinical trials in a timely and high quality manner.
- **For its ability** to manage pharmaceutical aspects of clinical trials using health products through Clinical Trial Department (CTD) of AGEPS.
- **For the access**, through its network, to a full array of specialized core laboratories, including advanced imaging, IT Solutions and biobanking.
- **For its nationwide availability**, and its access to the European network of ECRIN

The PARTNERS (**PA**rtners **foR** **IN**ternational **CL**inical **RE**sea**R**che**S**) platform, labeled F-CRIN, is an alliance of stakeholders which all provide support for clinical trials to investigators and sponsors, in compliance with most rigorous international standards. PARTNERS' members bring together their scientific, operational, financial, and regulatory expertise for achieving the optimal design and operational conduct of clinical trials.

Any clinical research project can be managed by PARTNERS, from early phase proof-of-concept studies to large scale multinational clinical trials, sponsored by the pharmaceutical industry or by academic institutions and covering multiple therapeutic areas and research fields. PARTNERS' high level trained staff is reactive and easy to mobilize up on sponsor or investigator request.

PARTNERS is a full-service clinical trials platform, with the added value of its academic credibility and the diversity of its members' expertise. PARTNERS' offer can be adapted to sponsor's needs, full-service or more adjusted. PARTNERS' value is in its global vision, its smooth and efficient coordination, and its transversal support including expertise in innovative methodology and proof-of-concept studies, in clinical treatment units preparation by AGEPS, in bioinformatics and in imaging. PARTNERS platform is available nationwide, and in Europe through the E-CRIN network.

## Our partners

The PARTNERS platform combines numerous experts in the same structure through associated major institutions: Assistance Publique - Hôpitaux de Paris, French National Institute for Health and Medical Research (Inserm) and Paris Diderot University, Paris Sorbonne Cité University (USPC).

**Corinne Alberti**, the Head of the Clinical Trial Unit of Robert Debré Hospital, is particularly experienced in clinical trials in pediatric populations, including clinical trials in rare disease requiring innovative design for achieving trial's objectives despite small number of patients.

**Eric Vicaut**, the Head of the Clinical Trial Unit of Lariboisière Hospital has a rich experience in management of multicentric national and international trials. He acts as the Head of Medical Device Evaluation Center.

**Sylvie Chevret**, the Head of Biostatistics and Medical Information department at Saint-Louis Hospital has a strong experience in clinical trials and specifically in early phase trials in oncology.

**Karine Chevreul** is the scientific coordinator of the Clinical Trial Unit in Hôtel-Dieu Hospital specialized in Medico-economic evaluation.

**Patrice Debré** is the Head of CIB Network (Centers of Biological Investigation) that provides the expertise in biobanking and management of samples circuits.

**Céline Feger**, the Head of EMIBiotech, brings her expertise in designing clinical development plan for drugs and medical devices, and her experience of operating for pharmaceutical and medical device industry.

**Jacques Felblinger**, the Head of Clinical Investigation Center for Technological innovation (CIC-IT) in Nancy, provides the expertise and methodological support for clinical projects involving imaging.

**Serge Hercberg**, the Head of the Unit of Nutritional Epidemiology, is ensuring the expertise concerning nutrition. He is known for its large studies involving particularly high number of participants (n: 500 000).

**Hervé Le Nagard** is co leader of the university platform for bio-modelling and storage of biomedical data (CATI-BioMéd). Within PARTNERS platform he is ensuring the hosting of large databases with technical expertise for Health datastorage and security.

**Alain Mallet** is the Head of the Clinical Trial Unit of La Pitié-Salpêtrière Hospital, with a rich experience in management of multicentric national and international trials.

**France Mentré** is the Head of Biostatistics in Bichat Hospital and an expert in statistical modelisation, more specifically in Pharmacokinetic/ Pharmacodynamic studies.

**Tabassome Simon** is the Head of the Clinical Research Platform of East of Paris and of the Biological Resource Centre (CRB) with a rich experience in management of multicentric national and international trials, in biobanking and management of samples circuits.

**Annick Tibi** acts as the Head of Clinical Trial Department (CTD) of AGEPS and ensures the organization and management of the pharmaceutical aspects of clinical trials using health products (drugs and medical devices).

**Jean-Marc Treluyer** is the Head of the Clinical Trial Unit of Necker Hospital. His expertise covers rare diseases and pediatrics pharmacology.

**Florence Tubach** is the Head of the Clinical Trial Unit of University Hospitals Paris Nord Val de Seine (HUPNVS) and co-head of Pharmacoepidemiology Center.

## The F-CRIN infrastructure (French Clinical Research Infrastructure Network)

F-CRIN's mission is to reinforce the visibility and the competitiveness of French clinical research, whether academic or industrial, particularly on the European and international level. The infrastructure has labelled clinical investigation networks centered on 8 themes and clinical research support platforms, all partner entities of the PARTNERS platform.

On a European level, F-CRIN is associated with ECRIN, a European structure whom F-CRIN is the French scientific partner for the set up and the management of complexe multinational clinical trials.

In addition to permanent teaching for medical students most of our partners are involved in specific clinical research trainings.

Prof. Sylvie Chevret is responsible for Master Diploma of Public Health and Health Management (Univ. Paris Diderot) with Pr. Corinne Alberti, Pr. Florence Tubach, Pr. France Mentré and Pr. Karine Chevreul as a teaching staff.

Prof. Tabassome Simon is the Coordinator of Master Diploma of clinical research, DIU-FARC-TEC and DIU-FIEC diploma at Pierre et Marie Curie University (Paris VI), with Pr. Eric Vicaut as a teaching staff.

Prof. Florence Tubach is coordinator of the university diploma for the formation of project managers in clinical research.

## Our expertise
